

# Highland Community School Parent Pledge

We know we are all part of the Highland community and we commit to modeling behaviors for our children that keep our family and community safe. To demonstrate our commitment to a safe reopening of our school, we promise to:

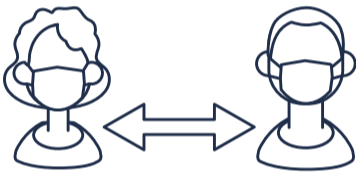

## Limit Social Contacts

Our family will not expand our social circle and will avoid all large gatherings. Wherever possible we will tighten our circle to reduce exposure.

## Practice and Model Good Hygiene

I will model good hand hygiene by washing my hands for 20 seconds and using soap, using hand sanitizer, and catching coughs and sneezes in an elbow. I will keep my family's masks sanitary with frequent washing and send my child to school with backups in their backpack.

## Keep Distance From Others

I will stay 6 feet from others not in my family and support my student in their pledge to maintain distance outside of school. I will not gather or allow my family to gather on school grounds when not otherwise permitted.

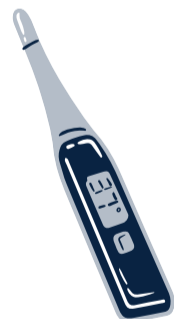

## Follow Travel Guidelines

If travel outside of Wisconsin is absolutely necessary, my family will quarantine for 10 days.

## Wear a Mask

I will model proper mask wearing and require my student to wear a mask outside of school hours when they are with others outside our immediate bubble.

## Complete Daily Health Screenings

I will take my child's temperature and fill out a health screener for each child in my family every morning. To make it easier, I can download the Kinsa app for our school!

## Follow New Drop-off and Pick-up Procedures

Staggered start times add complexity to school staff's job and are crucial to maintaining school safety. I commit to having my student(s) at their assigned door ready to enter at their assigned time, picking my student up at their assigned time, and not lingering on school property. I will model social distancing at drop off and pick up and not congregate with other parents.

## Highland promises to:

- Keep disposable masks and other PPE stocked and available for our staff and students.
- Ensure that cleaning supplies are readily available and that our school is disinfected regularly.
- Regularly inspect our HVAC, replace filters at regular intervals.
- Follow CDC and local health guidance regarding safe operations of our building.
- Keep an open dialogue with all members of our school community on practices and procedures to keep our school safe.
